DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it contains legal phraseology (e.g., "said") and is a run-on sentence. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claims 4-16 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-16 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Art Unit: 3671

Regarding claim 1, the phrase "or like" renders the claim indefinite because the claim includes elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hedblom (U.S. Patent 5,676,488). Hedblom discloses a surface marking including resin, thermoplastic polymers, softeners, reflecting material, and friction material (see Table at column 16-17, for example). There are at least two layers (Figure 2, for example) including a wear layer (see abstract, for example) and a heat-activatable adhesive material (column 11, lines 18-23, for example).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references teach surface marking compositions.
